I'm Roman Uddin, an experienced mobile app developer with expertise in React Native and Native Android development.

I understand that you're looking for a proof of concept (POC) — not a full-fledged application — focused on demonstrating the ability to share digital media through certain forms.

Once I receive the complete details via IM, I can quickly:

- Review the requirements
- Share a clear time and cost estimate
- Start building a simple but functional design to prove feasibility

I'm ready to start immediately and will focus on creating a clean, working POC.

Looking forward to your message and detailed discussion!
